## User not logged in

A user that is not logged in can browse through all the posts. The main page will show trending blogs. They cannot comment, like or write any posts. The search bar allows the user to find specific posts by title or by author.

## User logged in

If the user does not have an account, they may register to the site by filling the registration form. Now, they can go the "My Blog" page, where all their existing posts can be seen. The "Make Post" button allows the user to create a new post. The user can also like other posts and add comments. The search bar allows the user to find specific posts by title or by author.

## Admin

After the admin logs in, they can view all the posts and filter them. In addition, it can delete the post. The admin can also view the users, filter them and, similarly, delete them.
